1. The following is an examiner's statement of reasons for allowance: The closest prior art EP'252 teaches a laminated packaging film comprising (B) a metallocene-catalyzed linear low density polyethylene layer (mLLDPE) and (A) an aluminum layer wherein the aluminum layer may be formed by vapor deposition of aluminum onto a polymer base such as a polyethylene layer wherein the laminated film may comprise additional layers such as a paper substrate (C) and an additional polyethylene layer (D) on the opposite side of the aluminum layer (A) remote from (B), such that EP'252 teaches a laminate comprising the following layer structure: mLLDPE(B)/vapor-deposited aluminum on polyethylene base(A)/paper substrate(C)/polyethylene layer (D). EP'252 does not teach or fairly suggest a step of vapor-depositing aluminum on one side of a web film containing mLLDPE, winding the metallized film temporarily for a predetermined time, unwinding the metallized film, laminating the metallized film to a carrier layer via an extruded polyethylene layer, and then forming a print layer on the external surface of the laminate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
